An Astrologo-Physical Discourse.

That the pre-dominion of humours, is the immediate cause of diseases; and that the excitation of these humours, is caused by the various and different Aspects and Positions of the Stars is even by Hippocrates and Galen themselves confirmed. Trust we then to these Rules Astrological, to be observed for the advantage of the sick.

But let her be also in the Aspects of the Fortunate Planets, and seated in a fortunate part of Heaven.

It is good to purge with Electuaries, when the ☽ is in ☽; with Pills, when she is in ☽; with Potions, when in ☽, because then posited as before directed.

Woman are unsafe for all sorts of complexions and constitutions; yet sometimes there is a necessity for them; as when the Distemper herb above the stomach; it being impossible for a Purge, or any purgative Medicine thence to carry it; but when there is an occasion they may be safely taken when the ☽ is in ☽, III, or ☽ in any good Aspect of ☽, ☽, or ☽.

Glysters are most conveniently administered, when the ☽ is in ☽, III, or ☽, posited as before.

Good to stop Fluxes, or Rheumes, or Issues, when the ☽ is in any of the Earthly Signs, viz. ☽, III, or ☽; of which experience is a valuable witness.

Very proper to Bath, when the ☽ is in ☽, III, or ☽, in Aspect of ☽, or ☽.

Convenient to cut Hair, the ☽ being in ☽, ☽, III, or ☽, increasing in Light. And although it be in the opinion of many but a trivial thing to observe; yet were it more taken notice of by the Gallants of our times, they need not disguise themselves with Venus Locks: One obey, it may be, esteem it an Honour to be made amends with a part of her, that Originally injured them.

Medicina a medico; medela ab altissimo.

TRIGGE. 1682.
Judgements Astrological upon
Year of our LORD GOD 1682.

sun and delightful season begins (within London) on the Nineth day of March, Fifteen Hours, ten Minutes, and a half Midday: Or, on the Tenth day, at Ten Minutes after three of the Clock in the Morning, as it is set down in the Figure before going.

The Grand Affairs hereby signified, must, according to Astrologers, be derived from the second and the seventh Hours, all the Planets in the Heavens Possessing those two Angles. An really loth to tell you at large what Saturn, Jupiter, and the Moon signify, by being in the Seventh Angle; or yet what means by the Position of the Sun, Mars and Mercury, in the Second.

182.
2nd House in Aries, the great Dignities of the Sun and Mars, all in Quadrant of Jupiter, exalted on the Seventh. And yet I must tell you, That the Seventh Angle signifies Publick Enemies, Wars, Strifes, Controversies, Contentions, Rape, Violence, Banishment, as well unto Nations, Kingdoms, Countreys, as to Persons, &c. And the Second House denotes the Riches, Support, Assistance, and Poverty also, of Empires, Cities, Societies, &c. as well as of private Men. The Grand Evils of this Year relate both to Riches and Poverty, War, Controversies, and the Ruine of many Countreys as well as Families, &c. single Persons, whose Genitures Conspire herewith.

Ha! can Saturn, the Grand Significator of the People in this Year, Presage any good by being Posited in the Seventh Angle; intercepted there in Detriment and Retrograde, and in the very Power and Clutches of his Enemy? And he being naturally an Enemy to, and Poisoner of Humane Comforts? Hear what Astrologers say to such a Position.—viz.

If a Planet be Retrograde, he is in signification, as a mansolitious, Stupid and Infirm; Bethem. Aph. 2.

A Planet, not in his own House, more especially in Detriment, as a Man knocking at the door of another, and his Signification to be neglected and slighted, as having not Power to do any good, Beth. Aph. 27.— But if in the House of his Enemy, he signifies such as he represents to be in the same condition. Beth. Aph. 31.—

I might go further in the producing Authors, as Ptolemy, Mudo, Junotine, Haly, Marine, &c. and acquaint you with their Opinions at large. But these already Quoted shall suffice in this matter.

Albeit, Non-obstante those unkind Menaces, I can tell you, and truly too;—That if the Planet Saturn, naturally Author of Envy, Malice, and indeed of every thing that is Destructive, malignant, Fraudulent and Wicked; as he is in Leo, i.e. Persons signified

signified by him, be not too Ambitious, Proud and Insoliting
 no close-Fisted and Covetous! too sneakingly, and yet Timo-
 rously Treacherous and Sly! He may, that is, the People he fig-
 uises, may be happily Assisted by the Noble Triad of the Sun and
 Mars, who by that amicable Beam of Preserving Influence,
 seems forward and willing to unbew his frozen Charis, and
 acquit him of his spiritual Tenalme, and afford them the free
 use, comfort and Enjoyment of all such Humane Felicitee and
 Advantages, which He so maliciously and Covetously Envies and
 Denies both to himself and others. The Envious Saturnine
 Man is his own Tormentor, as well as Destroyer of the Good and
 Peace of others. And is excellently Described by the Curious
 Pen of Mr. Cowley, thus

ENVY at last Crawls forth from that dire throng
 Of all the Direselft: Her black Locks hung long,
 Attir'd with Curling Serpents: Her pale Skin
 Was almost drop'd from the sharp Bones within;
 And at her Brest stuck Vipens which did Prey
 Upon her Panting Heart, both Night and Day
 Sucking black Blood from thence, which to Repair
 Both Night and Day they left Fresh Poisons there.
 Her Garments were deep stain'd in Humane Gore,
 And Torn by her own Hands, in which she bore
 A Knotted Whip, and Bowl, that to the Brim
 Did with green Gall, and Juice of Wormwood swim.
 With which, when She was Drunk, she furious grew
 And Lash'd her Self.—Thus from th'acursed Crew,
 Envy, the worst of Fiends, her self presents
 Envy! Good only when she her self Torments.

It was most excellent Justice done upon the Hoax-
 ders of Corn, and all other useful Commodities, (as I

have read it in our English Chronicles,) in a time of want and Scarcity, to Hang them up as Enemies to their Country, and to Humane Kind, that Others might by their Examples take Warning, and Learn not to abuse the Good Gifts of God and Nature. —

Saturn ! Saturn ! If thou continue thy Covetousness and thy Ingratitude to God and Man, thou wilt find others will be more Presidents of the like Noble Justice made upon the like Occasion. I will not say, merely from this Quarterly Ingress, that a Dearth or Famine is Menaced; No, but considering and comparing it with the Revolutions of those years of Scarcity, which in this Nation have formerly happened: viz. the Years 1440. 1507. 1557. 1595. &c. And with the Effects of the late Terrible and Amazing Comet or Blazing Star, visib'e to all Europe; I have great Cause to doubt, that if this very year do not produce a Famine, we cannot be very far from One, and that so great, that we shall be sadly sensible of the Displeasure of an Angry and offended Deity, whose Goodness we have provoked with our manifold Sins and Transgressions of almost every kind. *Dens divisoris Judicium.*

I might likewise Give Notice of many Unfortunate Marriages that are likely to Happen in this Year; And that many that are Married will be in great danger of Separating each from other, upon the Score of pretended Jealousie, and other very slight Occasions. As also of many Abortions to Happen to Women with Child, and many strange Domestic Differences, viz. between Father and Son.

Son, Master and Servant, &c. as well as between
Husbands and Wives: But warning Roud I shall
pass by all further Discourse thereof, and so End the
Spring Quarter. — I shall but just Name the other
three, and come to the Eclipses.

2. Of the SUMMER-Quarter.

The *Aestival* or *Summer-Quarter* begins always
where the Spring ends, the Sun then Mounting his
Apogeeon Chair of Honour, is Removed to his great-
est Distance from the Earth, making to us in those
Northern Countreys, largest Portion of Sun-shine,
and least quantity of Shadow: Or, (which is all
one,) longest Days and shortest Nights among us.
This Seation beginneth on the tenth day of June, at
which time the Sun enters the Tropical Sign of Ca-
cer, and continues all the while he passeth the Signes of
Cancer, Leo, Virgo. — If you would know the true
Philosophical and Cabalistical Significations of
the Four Seasons, you may please to Consult my last
years *Calendarium Astrologicum*.

3. Of the AUTUMNAL Quarter.

The *Autumnal* or *Harvest-Quarter* is the third
part of the Astrological Year, being the declining
Equinox thereof, as the Spring was the Inclining Ea-
quinox: These being always in opposition to each
other, like Aesop's Buckets, as one goes up, the other
still goes down. The Days and Nights are now ag-
ain equal all the World over; And the Sun doth
equally Irradiate both the Poles, as he did at the be-
ginning of the Spring. — This Seation always begin-

ing

where the Summer ends, viz. when the Sun toucheth the first Point of *Libra*, on the Twelfth day of September, and continueth all the time the Sun passeth by the Signs of *Libra*, *Scorpio* and *Sagittarius*.

4. Of the Brumal or *WINTER*-Quarter.

The *Winter* Quarter constantly begins where the *Autumnal Season* Ends; And with Astrologers Commenceth when the Sun salutes the first Scruple of *Capricorn*, the Earth being then farthest distanced from the Sun's Perpendicular Rayes, receiving greatest Portion of Shadow, and least quantity of the Solar Beams, or Sun-shine; and so causeth shortest Days and longest Nights, to all those that inhabit on this side of the *Aquator*. The Sun is now in his nearest distance to the Earth, being in exact opposition to his *Apogee*, which is in *Cancer*, as was before-mentioned in the *Summer Quarter*. Thus much for the four Annual Seasons.

Of the *ECLIPSES* which will Happen in this Year of our *LORD GOD*, 1682.

There will be two *ECLIPSES* of the Moon in this Year, according to *Gadburie's Ephemerides*, and those total and nearly Central also; But one of them will only be visible to us in *England*, which will be the first.

The First Eclipse of the Moon will be on the Eleventh day of *February*, about eleven of the Clock at Night. It will be Celebrated in almost four degrees of the *Celestial Virgin*. This Eclipse will be very great, and of long continuance, because it happens near the Moons North-Node; and will (I hope) invite the Curious in *Astronomy*, to make some Observations

The Second will be on the Eighth day of *August*,
in 25 degrees of *Aquarius*; It happens about one
Six of the Clock in the Morning, and therefore in-
visible as to us, but in it self will be as great an Eclipse
as the former.

The Sun will also twice come within Ecliptical Boundaries,
viz. on *January* the 28th, and on *July* the 24th, dayes. But it
will be so small a Matter, that it is not material to be Minded.
Howbeit, those that are Curious, and furnished with Fit Instru-
ments, may observe them on the said dayes; The First about 4 h.
P.M. And the Second about 9 h. A.M.

¶ On *September* the twelvth day will be Celebrated a
most Famous, but unusual Conjunction, of the two Maleficks
Saturn and *Mars*, in 17 degrees of the Regal Sign *Leo*, and *Jupiter* is also very near unto them. *Leo* signifies the Heart in Em-
pires, Kingdoms, Nations and Countreys, as well as in private
Persons; But my Limits are too narrow for to Treat of such E-
minent Matters in this place. I shall therefore break off all
Discourse thereof, and Conclude my Judgements of the whole
Year. *Soli Deo Gloria.*

*Of the Dayes of the Week, and how they came to be
thus Named.*

1. **SUNDAY**, is so called of the Sun, either Respecting the
Honour due to that Glorious Lamp of Light, whose Presence
refreshes all things: Or else, with regard to the R-surrection
of Our Blessed Saviour, who Rose on this day from the Se-
pulchre, wherein he had bin Buried, after his Crucifixion for
the Sins of Mankind. Hence it is called *Dies Dominicus*, the
Lords Day, or Sunday. Some have thought the Sun to be Mr-
loch, because he is King of Stars, and so have Adored him.

2. **MONDAY**, so called in Honour of the Moon, the second
Great Luminary of Heaven, (at least to common apprehension,
and Comforts of the Night. And for the great Benefit Mankind
receives from her, she is Honour'd as the Queen of Stars and
Planets, and had a day of the Week Assign'd to her Regency. She
